IP cameras, HD-SDI/CVI/TVI and AHD equipment, NVRs, DVRs, VMS and CMS software packages, access control, tools, accessories, and more. Call us today and experience the CCTV.net difference!

• Nurse Call System.

When it comes to healthcare organizations, keeping nurse call paging systems and sound masking systems well maintained is our goal. Reliable communication is important for patient care and staff members. Reliable communication is important for patient care and staff members. Our team is dedicated providing quality solutions

• BMS.

We offer an extensive range of building automation products; from building automation systems and security systems through to application software, controllers, valves and sensors; thus realizing high functionality and quality. These products and services are provided through an integrated framework, ranging from instrumentation design to sales, engineering, maintenance, energy-saving solutions and facility operation and management.

We solve problems at plants, factories, and a variety of other production sites by providing products, solutions, instrumentation, engineering and maintenance services to support optimal operation of our customers' facilities and equipment throughout their life cycle. Through collaboration with the people involved in production, we develop advanced measurement and control technologies, strive to realize production sites where workers can safely develop their skills, and create new value for our customers.

OUR PARTNERS.

1.

TRIAX
connecting the future

TRIAX is a global supplier of reliable, innovative products and solutions for the reception and distribution of video, audio and data signals.

Our Products are used in homes, businesses and operator networks by broadcasters, satellite, cable and telecom operators.

Our Solutions combine our hardware and software expertise to deliver value to hospitality and related markets, through a partner network of system integrators, large installers and operators.

TRIAX's headquarters, production and R&D base is in Denmark. With 9 international sales subsidiaries we operate in more than 60 distributor countries. The TRIAX team consists of 300 employees and is owned by Polaris Private Equity.

For nearly 70 years, TRIAX has strived to be your preferred partner for all your connectivity needs. We're proud to provide reliable solutions for the present, while connecting our customers to the future.

At the forefront of technological trends and developments, we're with you each step of the way, from installing home connections and business critical hospitality solutions, to realising complex, large scale integrations. Ready for any job at hand, our products are available individually or as part of tailor-made solutions. From aerials and dishes, to headends, outlets, cables and beyond – we make connectivity easy, ensuring you live up to your own customer promises.

• Triax Solutions.

Seamless integration. Boundless opportunities. One unique supplier.

The hospitality business is all about being in touch. We help businesses stay in touch with their customers via an easy, accessible platform backed up with exceptional hardware and support.

TRIAX Solutions are a hospitable combination of key components: our well-known reliability, a valuable understanding of your business, an innovative mindset, and, of course, future-proof technology.

• TV Distribution.

TRIAX has the technological leadership and passion for delivering innovative and reliable solutions to the hospitality sector. Offering superior flexibility, with a modular, adaptive design and hybrid installation options, TRIAX headends ensure a lifetime technology investment, with low depreciation and maximum ROI.

All TRIAX headend solutions offer plug-and-play installation, hot-swap and remote access – reducing configuration, installation and service time. Together with future upscaling prospects, reliable performance and ease of use, TRIAX headend solutions boost customer goodwill and loyalty, which means repeat business and increased revenue for you.

2.

Exterity is a global company with a presence on every continent. We've been around for over 17 years and the same core Executive team has been in place since the start. We're profitable and have an ambitious growth strategy; in fact, we've seen double or triple digit growth year on year and this is set to continue.

If you are passionate about technology and think you have what it takes to work in IP video or software development, we'd love to hear from you!

• Exterity Solutions.

iPTV :

Traditionally refers to television that is distributed over an IP network — the same kind of network people use to surf the internet and exchange emails. In reality, IPTV technology enables an organization to use an existing IP network to carry much more than just television. With IPTV, you can easily distribute live terrestrial and satellite television and radio, video, DVDs, digital Video on Demand (VoD), digital signage, information boards and web content throughout your facility. This multimedia content can be viewed on standard and Smart TVs thin clients, large format displays, as well as desktop computers. Recent technology innovations now enable IP video distribution beyond the wired LAN to include WAN, the internet and mobile devices.

3.

Axis Communications was formally founded in 1984 by Mikael Karlsson, Martin Gren and Keith Bloodworth. The year before, Mikael Karlsson and Martin Gren founded Karlsson&Gren Firmware, but when they met Keith Bloodworth, Axis Communications was established. Martin was the engineer with the product vision, Mikael was in business administration and Keith was the person who gave us the name Axis as well as the indirect sales-model.

SURVEILLANCE SOLUTIONS

With over thirty years of experience, we have mastered and continue to develop a full range of IP technology to manufacture products and provide video surveillance solutions. We are specialized in public safety, mobility and the MOG industry, but our products and services can be applied in any sector where security is a necessity.

We provide governments, businesses and industry giants with solutions that ensure their assets both off-shore and on-shore, regardless of weather conditions can be safely monitored. By including our secret weapon, the VMS, our solutions (which are manufactured in-house for the best quality) offer security, safety and ease of use.

← Siquira RA solutions.

Siquira helps its partners and clients with in-house manufactured systems that cater for any video security solution that you are looking for. We promise reliable build quality and 24/7 worldwide support.

7.

With a continued focus on using our ingenuity, experience and global resources to deliver more efficient and more intelligent solutions, we aim to create a positive difference in environments and communities around the world.

Providing sustainable solutions We proudly provide a vast array of products that support energy efficiency in homes, schools, hospitals, offices, and more. As a natural extension of that focus, we are always challenging ourselves to pursue new ways of designing, engineering, producing, packaging and distributing our products in ways that are environmentally responsible, so we can help our customers do even more with less waste.

At Leviton, we know diversity is the key to real innovation. It goes beyond gender, ethnicity, or hiring practices and actively works to make sure people from a variety of backgrounds and experiences are heard. We believe a truly diverse company is one where each employee is recognized for contributing something different, and we're committed to making that happen in a collaborative environment.

8.

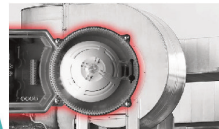

by Honeywell

Honeywell is a Fortune 100 company that invents and manufactures technologies to address tough challenges linked to global macro trends such as safety, security, and energy. With approximately 122,000 employees worldwide, including more than 19,000 engineers and scientists, we have an unrelenting focus on quality, delivery, value, and technology in everything we make and do. Honeywell's core businesses are Aerospace, Home and Building Technologies, Safety and Productivity Solutions, and Performance Materials and Technologies.

Novar GmbH with ESSER brand is part of Home and Building Technologies. A broad, future-oriented portfolio of custom-made fire protection concepts and innovative voice evacuation systems make ESSER one of the leading experts for safety in buildings.

For approximately 40 years the ESSER brand stands for custom-made solutions for professional fire protection. Furthermore voice alarm and public address systems as well as intelligent management systems are the company's core businesses. Innovative technology, favorable cost of ownership and excellent system compatibility guarantee highest flexibility and cost efficiency of the ESSER products and support ESSER's position as one of the leading providers of safety in buildings.

9. azbil

Since our establishment in 1906, we have pursued measurement and control technologies, delivering unique solutions to our customers. In April 2012, we changed our company name from Yamatake Corporation to Azbil Corporation, making the azbil brand familiar to many people. Today, the azbil Group provides unique levels of customer-oriented value in offices, production sites, and daily life all over the world through its three business segments: Building Automation, Advanced Automation,
